

### E10 Stainless Steel Cable Labels

On solar farms projects comes cables - a lot of them! It is essential to know where each cable is, and where it connects to. This is vital when fault finding and maintenance is required. With our cable labels we use 304 Stainless Steel for the most corrosive environments and laser etched permanent text to ensure a long lasting solution. This label is proven to save 1800% of installation time over traditional cable label. The E10 is a 2 part click fit system that only takes 5 seconds to install!

ZERO MAINTENANCE

QUICK TO INSTALL

LONG LASTING

### Product Specifications

Material Type	304 Stainless Steel
Operating Temp	-80o to +538o Celsius
Density (kg/m3)	8000
Tensile Strength (Mpa)	515
Yield Strength (Mpa)	205

### Benefits

- No water absorption
- Non-flammable
- Excellent ultraviolet resistance
- Excellent chemical resistance
- Provides a strong, durable method of cable labelling
- Can be used in a wide range of indoor, outdoor and underground applications
- Smooth surfaces and rounded edges assures cable protection and worker safety
- Laser etched permanent text
- Quick and easy to install at only 5sec
