## DCFT Cable Clamps

Electrical Connections DCFT Cable Clamps are designed for the harshest environments. Manufactured from 316 grade stainless steel they are available in multiple sizes ranges and can take both trefoil and single cable configurations. The clamp is supplied with a Low Smoke Halogen Free cable pad to both position the cable and provide padding. DCFT Clamps are designed to be fixed using a single centre mounted bolt. DCFT cable cleats are designed to IEC Standard 61914 and Type tested and certified to DNV approval.
