

NAT-GUM

Nat-gum is a high-end, self-adhesive bonding tool for specialist individual applications. When other alternatives don't work, Nat-gum is generally the answer. This tape has been developed alongside many of our permanent fixing applications, and is available in a wide range of sizes and thicknesses. Nat-gum has an internal carrier which ensures the adhesion doesn't shift from the fixing point.

LONG LASTING

Product Specifications

Material Type	Foamed acrylic - solid form
Material Colour	Transparent - excellent clarity
Density (kg/m ³)	Firm 1000kg/m ³
Shear	Normal 5.8kgf/cm ²
Temperature Resistance	-40° C to +120° C
Curing Time	50% 20mins 100% 3 days

Benefits

- No drilling required
- Provides a strong, durable method of installation
- Ultra high bond
- Great for high energy surfaces
- Used as an alternative to rivets, screws and liquid adhesives
